

**EZ PANEL™ Solutions**

# Your new standard

*for control panels*

## WELCOME TO PANEL FAB

EZ Panel Series Product Catalog. We've updated our offering and continue to provide you with industry leading solutions for your control panels. We are proud to present the largest expansion of our product line since its' inception.

**What is an EZ Panel?** EZ Panels are custom, pre-fabricated subpanel assemblies that you can specify and order using one simple part number. Panels ship ready for controls installation and enclosure mounting.

**Why buy from Panel Fab?** Standardizing on our panel solution simplifies every control project to save you time and money. We are here to serve you in any capacity and with a smile. Need more reasons?

- **Large inventory** of panel components = quick turnaround
- **Huge selection** of sizes and options = compatibility with any control system
- **High quality control standards** = order accuracy and great looking panels
- **Easy, flexible ordering** = no panel order minimums or rush order fees
- **Personal Service** = quick answers on product info and order status
- **Available UL Listing** = panels built to meet the strictest standards
- **Stability** = in business since 2000 serving control manufacturers, OEM's, mechanical contractors, control contractors and integrators

**Why outsource if you already build panels in-house?** Many of our customers have taken a hard look at their operation to discover that this new standard offers significant savings and simplifies every project. Managing an in-house staff is often difficult. Demand fluctuations leave employees with not enough to do, or an inability to keep up. By partnering together, we can drastically reduce the time and money you spend engineering, specifying, ordering, receiving, and fabricating control panels. When your EZ Panel arrives, you can have your in-house shop mount and wire your components or send it right out to the job with a technician.

**Ordering is EZ!** On the first page for each panel size, you will see a Model Selection Guide like the one shown below. To build your custom model number, simply consult the remaining pages of that panel section to specify options for each of the highlighted fields. Once all selections have been made, you are ready to place an order. Also shown below is a visual example of how your model number and panel is assembled.

Fill in the blanks to build your custom model number by selecting one Option from each Table											
<ul style="list-style-type: none"> <li>Consult pages 3 thru 8 to select the Material, Layout, Power Control, and other Options that best suit your application.</li> <li>Example model number ... SUB-S-2420-HG-X-X-DD-050-050</li> </ul>											
Table	Options	Model #	SUB	S	2420	HG	X	X	DD	050	050

  

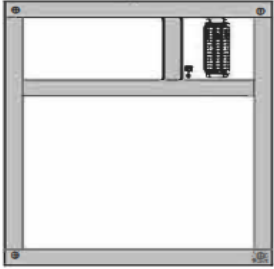

**Step 1**

Select a subpanel that is Compatible with your enclosure and NEMA rating.

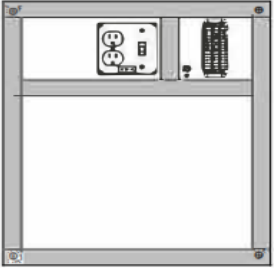

- 10 sizes available
- all NEMA ratings available

**Step 2**

Select a layout configuration that provides ample space to field mount and wire your components. Then choose a wire duct color.

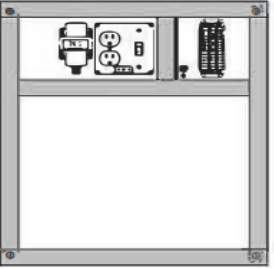

- 8 layouts available
- 2 wire duct colors available

**Step 3**

Select an optional power control device.

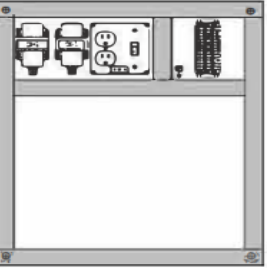

- 4 choices available

**Step 4**

Select an optional control power transformer or power supply.

- 23 choices available

**Step 5**

Select a second optional control power transformer or power supply.

- 23 choices available

**Example Model Number...** SUB-S-2420-HG-X-X-DD-050-050

Note: The letter "X" shown in the model number indicates no options have been chosen for this field.

**Placing your order...** Now with your EZ Panel model number in hand, simply consult your local distributor or contact us directly for pricing and to place your order.

**Tracking your order...** Orders are always confirmed upon receipt. Depending on the volume of outstanding orders and the size of your project, production time will generally range from 3 to 10 days. Upon completion, we will also be glad to follow up with an email confirmation including your shipment tracking number, and estimated delivery date.

*Please contact us at any time for assistance with model selection, pricing, or placing your order. Our customer service reps are ready to assist you.*

**Phone Orders** 470-412-0173

**Email Orders** [sales@panelfabricator.com](mailto:sales@panelfabricator.com)

#### Fill in the blanks to build your custom model number by selecting one Option from each Table

- Consult pages 3 thru 10 to select the Material, Layout, Power Control, and other Options that best suit your application.
- Example model number ... SUB-S-2420-HG-X-X-00-050-050

**Notes**

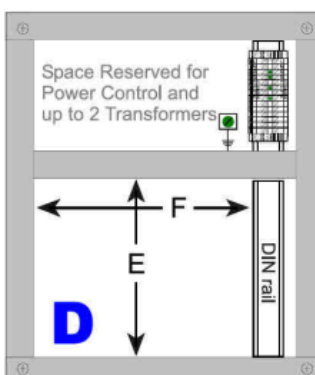

- \* Option is not available if separate Power Control was selected
- \*\* Option is not available if separate Power Control was selected OR UL Listing is required
- \*\*\* Due to space limitations, this option is not available with Power Control DD, FD, or DL

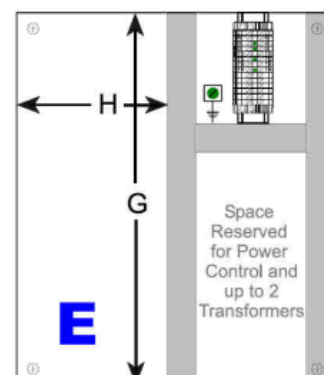

20 x 16 Horizontal Layout  
w/ 1.25" x 3" Wire Duct

20 x 16 Vertical Layout  
w/ 1.25" x 3" Wire Duct

20 x 16 DIN Rail Layout  
w/ 1.25" x 3" Wire Duct

20 x 16 Economy Layout  
w/ 1.25" x 3" Wire Duct

**INSTRUCTIONS:** Use Table 1 to select a subpanel that is compatible with your enclosure and NEMA rating. Insert the blue letter for Material Selection in the first highlighted field. Use the interior mounting dimensions in Table 2 to determine which Layout Configuration provides ample space to field mount and wire your components. Choose the blue letter for the appropriate layout drawing and insert this as the first character in the second highlighted field. The second character in this field will indicate wire duct color... “G” for grey or “W” for white.

Select (1) Option and insert the letter to fill in the highlighted field of the EZ Panel model number

### MODEL SELECTION NOTES

**Note 1:**

Insert the letter "X" in this field of the EZ Panel model number if no Option is required.

**Note 2:**

All Options are available individually. If more than (1) Option is required, simply order the additional Options using the prefix "EZ-".

Example: If your panel requires a 10 amp circuit breaker... capability to isolate the 24VAC circuits... and (20) extra terminal blocks... you would order (3) items as follows:

- SUB - P - 2016 - HG - X - C - DS -100 - 100
- EZ - G
- EZ - J

**Note 3:**

Photo Shown as typical for panels having (2) transformers

#### 3 AMP Breaker

3 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

A

#### 5 AMP Breaker

5 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

B

#### 10 AMP Breaker

10 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

C

#### 3 AMP Fuse Holder

3 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

D

#### 5 AMP Fuse Holder

5 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

E

#### 10 AMP Fuse Holder

10 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

F

#### Isolate 24VAC Circuit

Switching terminal block substituted for each 24VAC hot terminal block

\*See Note 3

G

#### Terminal Cover

Transparent finger-safe terminal block cover. Threaded nylon nuts must be removed to access terminal block.

H

Continued on  
next page

### 10 Extra Terminals

I

**10** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 20 Extra Terminals

J

**20** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 40 Extra Terminals

K

**40** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### Isolated 120VAC

L

Solid wall wire duct to isolate line voltage terminal blocks and all 120VAC circuits. See Supplementary Spec "L" on page...

\*See Note 3

### 2 Gang Cat5E

M

Two gang plastic cover plate with (2) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### 4 Gang Cat5E

N

Four gang plastic cover plate with (4) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### Cat5E Cable

O

5ft Cat5E, male/male cable shipped loose.

\*See Note 3

# EZ PANEL™ 2016

End Stop	Entelec	20635116
Marking Cards	Entelec	23300001
Jumper Bar	Entelec	17478420
Jumper Post	Entelec	16860416
Ground Lug	Thomas & Betts	L70

### MODEL SELECTION NOTES

\* Power control (SW-1) is optional

If no Power Control is selected, insert the letters **XX** in the highlighted field of the EZ Panel Model Number.

If no Power Control is selected, but factory mounted transformers are still required; transformers will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Inserting XX in this field is mandatory if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers. See below for related wiring schematics.

\*\* Transformers (TX-#) are optional

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

#### Power Control Option

**DS**

15 amps

2 x 4 steel box w/ cover

#### Power Control Option

**DD**

15 amps

4 x 4 steel box w/ cover

**Special Note:**  
Due to space limitations, only (1) transformer is available with this Power Control option.

#### Power Control Option

**FD**

Functional Devices p/n:

PSPT2RB10

10 amps

4 x 4 plastic box w/ cover

**Special Note:**  
Due to space limitations, only (1) transformer is available with this Power Control option.

Internal jumper allows receptacle to be continuously controlled by the switch

See next page for more Power Control Options

### Power Control Option

**DL**

15 amp rated components

4 x 4 steel box w/ cover

\* Includes red indicator light

\* Includes fuse holder w/ 10 amp fuse

**Special Note:**  
Due to space limitations, only (1) transformer is available with this Power Control option.

Supplemental internal wiring diagram  
for Power Control Option DL only

### Power Control Option

**XX**

Valid option is no factory installed

Power Control device is required for the panel. All transformers are HOT when panel is powered.

Also valid if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers.

Internal jumper allows receptacle to be continuously controlled by the switch.

Table	Options	Model #	SUB	-	2016	--	-	-	--		
-------	---------	---------	-----	---	------	----	---	---	----	--	--

Select Options for up to (2) total transformers and insert the letters to fill in the highlighted fields of the EZ Panel model number

## MODEL SELECTION NOTES

\* Power control (SW-1) from pages 7 & 8 were optional.

If no Power Control is selected, but foot mounted transformers or power supplies are still required; devices will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Due to space limitations, use of Functional Devices PSH Series Combination Power Supplies voids the option to have separate Power Controls from pages 7 & 8. If PSH Series devices are required, you should have the letters “XX” inserted for Power Control. These devices include both an integral disconnect/breaker and low voltage transformers. Together, they take the place of separate power control methods and standard foot mounted transformers. Refer to previous page for wiring schematics.

Transformers (TX-#) are optional

every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

## Functional Devices Transformers

I21	NDR-120-24	90-264 VAC	24 vdc	120W	Adjustable output. DIN mounted

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with "L" selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option "L" dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option "L" is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

#### Fill in the blanks to build your custom model number by selecting one Option from each Table

- Consult pages 3 thru 10 to select the Material, Layout, Power Control, and other Options that best suit your application.
- Example model number ... SUB-S-2420-HG-X-X-00-050-050

**Notes**

\* Option is not available if separate Power Control was selected

\*\* Option is not available if separate Power Control was selected OR UL Listing is required

Table	Options	Model #	SUB	—	2020	—	—	—	—	—	—
-------	---------	---------	-----	---	------	---	---	---	---	---	---

Select (1) Option and insert the letter to fill in the highlighted field /  
of the EZ Panel model number

### MODEL SELECTION NOTES

**Note 1:** Insert the letter "X" in this field of the EZ Panel model number if no Option is required.

**Note 2:** All Options are available individually. If more than (1) Option is required, simply order the additional Options using the prefix "EZ-".

Example: If your panel requires a 10 amp circuit breaker... capability to isolate the 24VAC circuits... and (20) extra terminal blocks... you would order (3) items as follows:

- SUB - P - 2020 - HG - X - C - DS -100 - 100
- EZ - G
- EZ - J

**Note 3:** Photo Shown as typical for panels having (2) transformers

#### 3 AMP Breaker

3 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

A

#### 5 AMP Breaker

5 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

B

#### 10 AMP Breaker

10 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

C

#### 3 AMP Fuse Holder

3 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

D

#### 5 AMP Fuse Holder

5 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

E

#### 10 AMP Fuse Holder

10 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

F

#### Isolate 24VAC Circuit

Switching terminal block substituted for each 24VAC hot terminal block

\*See Note 3

G

#### Terminal Cover

Transparent finger-safe terminal block cover. Threaded nylon nuts must be removed to access terminal block.

H

Continued on  
next page

### 10 Extra Terminals

I

**10** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 20 Extra Terminals

J

**20** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 40 Extra Terminals

K

**40** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### Isolated 120VAC

L

Solid wall wire duct to isolate line voltage terminal blocks and all 120VAC circuits. See Supplementary Spec "L" on page...

\*See Note 3

### 2 Gang Cat5E

M

Two gang plastic cover plate with (2) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### 4 Gang Cat5E

N

Four gang plastic cover plate with (4) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### Cat5E Cable

O

5ft Cat5E, male/male cable shipped loose.

\*See Note 3

# EZ PANEL™ 2020

Custom prefabricated subpanel assemblies

## Model Selection Guide

Power Control Options

Table	Options	Model #	SUB	_	2020	_	_	_	---	---	---
-------	---------	---------	-----	---	------	---	---	---	-----	-----	-----

Select (1) Option and insert the letters to fill in the highlighted field of the EZ Panel model number

### 4 OPTIONS AVAILABLE

**DS**

**DD**

**FD**

**DL**

### TYPICAL WIRING

### TERMINAL ASSEMBLY

Shown for (2) transformers

#### Bill of Materials

COMPONENT	MANUFACTURER	PART NO.
Terminal Block	Entrelec	11511607
End Plate	Entrelec	11836816
End Stop	Entrelec	20635116
Marking Cards	Entrelec	23300001
Jumper Bar	Entrelec	17478420
Jumper Post	Entrelec	16860416
Ground Lug	Thomas & Betts	L70

### MODEL SELECTION NOTES

\* Power control (SW-1) is optional

If no Power Control is selected, insert the letters **XX** in the highlighted field of the EZ Panel Model Number.

If no Power Control is selected, but factory mounted transformers are still required; transformers will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Inserting XX in this field is mandatory if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers. See below for related wiring schematics.

\* \* Transformers (TX-#) are optional

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

#### Power Control Option

**DS**

15 amps

2 x 4 steel box w/ cover

#### Power Control Option

**DD**

15 amps

4 x 4 steel box w/ cover

**Special Note:**  
Due to space limitations, only (1) transformer is available with this Power Control option.

#### Power Control Option

**FD**

Functional Devices p/n:

PSPT2RB10

10 amps

4 x 4 plastic box w/ cover

**Special Note:**  
Due to space limitations, only (1) transformer is available with this Power Control option.

Internal jumper allows receptacle to be continuously controlled by the switch

See next page for more Power Control Options

### Power Control Option

**DL**

15 amp rated components

4 x 4 steel box w/ cover

\* Includes red indicator light

\* Includes fuse holder w/ 10 amp fuse

**Special Note:**  
Due to space limitations, only (1) transformer is available with this Power Control option.

Supplemental internal wiring diagram for Power Control Option DL only

### Power Control Option

**XX**

Valid option is no factory installed

Power Control device is required for the panel. All transformers are HOT when panel is powered.

Also valid if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers.

Internal jumper allows receptacle to be continuously controlled by the switch.

Table	Options	Model #	SUB	_	2020	_ _	_	_	_ _	→ _ _	→ _ _
-------	---------	---------	-----	---	------	-----	---	---	-----	-------	-------

Select Options for up to (2) total transformers and insert the letters to fill in the highlighted fields of the EZ Panel model number

## MODEL SELECTION NOTES

\* Power control (SW-1) from pages 7 & 8 were optional.

If no Power Control is selected, but foot mounted transformers or power supplies are still required; devices will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Due to space limitations, use of Functional Devices PSH Series Combination Power Supplies voids the option to have separate Power Controls from pages 7 & 8. If PSH Series devices are required, you should have the letters "XX" inserted for Power Control. These devices include both an integral disconnect/breaker and low voltage transformers. Together, they take the place of separate power control methods and standard foot mounted transformers. Refer to previous page for wiring schematics.

Transformers (TX-#) are optional

every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

## Functional Devices Transformers

EZ OPTION	PART NO.	INPUT	OUTPUT	VA	HUBS	FEATURES

NOTE 1: Not available with separate Power Control

NOTE 2: Not available if "U" was selected for UL Listing in the Approvals field of the EZ Panel model number

NOTE 3: Availability varies by panel size. Please refer to pages 1 & 2 of the Model Selection Guide to confirm compatibility

## MeanWell HDR/NDR Power Supplies

EZ OPTION	PART NO.	INPUT	OUTPUT	CAPACITY	FEATURES
I23	HDR-30-24	85-264 VAC	24 vdc	30W	Class 2, adjustable output, DIN mounted
I26	HDR-60-24	85-264 VAC	24 vdc	60W	Class 2, adjustable output, DIN mounted
I22	DRC100US24	85-264 VAC	24 vdc	100W	Class 2, adjustable output, DIN mounted
I21	NDR-120-24	90-264 VAC	24 vdc	120W	Adjustable output, DIN mounted

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with "L" selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option "L" dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option "L" is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

#### Fill in the blanks to build your custom model number by selecting one Option from each Table

- Consult pages 3 thru 10 to select the Material, Layout, Power Control, and other Options that best suit your application.
- Example model number ... SUB-S-2420-HG-X-X-00-050-050

	<b>I21</b>	Labeled DC-2, NDR-120-24, 24 vdc power supply, 120VAC input, 120 watt, DIN mounted										

**Notes**

\* Option is not available if separate Power Control was selected

\*\* Option is not available if separate Power Control was selected OR UL Listing is required

Table	Options	Model #	SUB	—	2420	—	—	—	—	—	—
-------	---------	---------	-----	---	------	---	---	---	---	---	---

Select (1) Option and insert the letter to fill in the highlighted field /  
of the EZ Panel model number

### MODEL SELECTION NOTES

**Note 1:** Insert the letter "X" in this field of the EZ Panel model number if no Option is required.

**Note 2:** All Options are available individually. If more than (1) Option is required, simply order the additional Options using the prefix "EZ-".

Example: If your panel requires a 10 amp circuit breaker... capability to isolate the 24VAC circuits... and (20) extra terminal blocks... you would order (3) items as follows:

- SUB - P - 2420 - HG - X - C - DS -100 - 100
- EZ - G
- EZ - J

**Note 3:** Photo Shown as typical for panels having (2) transformers

#### 3 AMP Breaker

3 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

A

#### 5 AMP Breaker

5 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

B

#### 10 AMP Breaker

10 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

C

#### 3 AMP Fuse Holder

3 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

D

#### 5 AMP Fuse Holder

5 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

E

#### 10 AMP Fuse Holder

10 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

F

#### Isolate 24VAC Circuit

Switching terminal block substituted for each 24VAC hot terminal block

\*See Note 3

G

#### Terminal Cover

Transparent finger-safe terminal block cover. Threaded nylon nuts must be removed to access terminal block.

# EZ PANEL™ 2420

Custom prefabricated subpanel assemblies

## Model Selection Guide

Options (Continued)

### 10 Extra Terminals

I

**10** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 20 Extra Terminals

J

**20** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 40 Extra Terminals

K

**40** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### Isolated 120VAC

L

Solid wall wire duct to isolate line voltage terminal blocks and all 120VAC circuits. See Supplementary Spec "L" on page...

\*See Note 3

### 2 Gang Cat5E

M

Two gang plastic cover plate with (2) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### 4 Gang Cat5E

N

Four gang plastic cover plate with (4) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### Cat5E Cable

O

5ft Cat5E, male/male cable shipped loose.

\*See Note 3

Jumper Bar	Entrelec	17478420
Jumper Post	Entrelec	16860416
Ground Lug	Thomas & Betts	L70

### MODEL SELECTION NOTES

\* Power control (SW-1) is optional

If no Power Control is selected, insert the letters **XX** in the highlighted field of the EZ Panel Model Number.

If no Power Control is selected, but factory mounted transformers are still required; transformers will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Inserting XX in this field is mandatory if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers. See below for related wiring schematics.

\*\* Transformers (TX-#) are optional

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

#### Power Control Option

15 amps

2 x 4 steel box w/ cover

**DS**

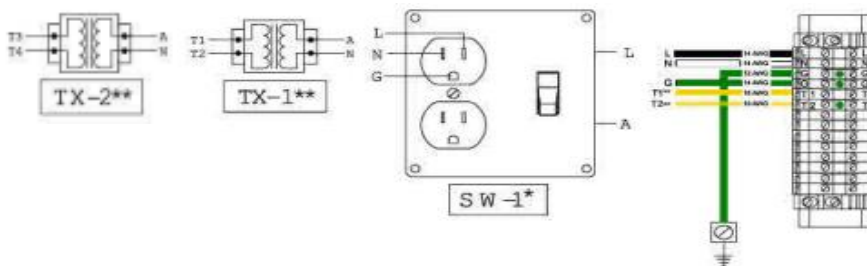

#### Power Control Option

15 amps

4 x 4 steel box w/ cover

**DD**

#### Power Control Option

Functional Devices p/n:

PSPT2RB10

10 amps

4 x 4 plastic box w/ cover

**FD**

Internal jumper allows receptacle to be continuously controlled by the switch

## Model Selection Guide

Power Control Options, Cont'd

### Power Control Option

**DL**

15 amp rated components

4 x 4 steel box w/ cover

\* Includes red indicator light

\* Includes fuse holder w/ 10 amp fuse

Supplemental internal wiring diagram  
for Power Control Option DL only

### Power Control Option

**XX**

Valid option is no factory installed

Power Control device is required for the panel. All transformers are HOT when panel is powered.

Also valid if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers.

Internal jumper allows receptacle to be continuously controlled by the switch.

Table	Options	Model #	SUB	_	2420	_ _	_	_	_ _	→ _ _	→ _ _
-------	---------	---------	-----	---	------	-----	---	---	-----	-------	-------

Select Options for up to (2) total transformers and insert the letters to fill in the highlighted fields of the EZ Panel model number

## MODEL SELECTION NOTES

\* Power control (SW-1) from pages 7 & 8 were optional.

If no Power Control is selected, but foot mounted transformers or power supplies are still required; devices will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Due to space limitations, use of Functional Devices PSH Series Combination Power Supplies voids the option to have separate Power Controls from pages 7 & 8. If PSH Series devices are required, you should have the letters "XX" inserted for Power Control. These devices include both an integral disconnect/breaker and low voltage transformers. Together, they take the place of separate power control methods and standard foot mounted transformers. Refer to previous page for wiring schematics.

**\*\* Transformers (TX-#) are optional**

every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

I21	NDR-120-24	90-264 VAC	24 vdc	120W	Adjustable output, DIN mounted

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with “L” selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option “L” dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option “L” is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

#### Fill in the blanks to build your custom model number by selecting one Option from each Table

- Consult pages 3 thru 10 to select the Material, Layout, Power Control, and other Options that best suit your application.
- Example model number ... SUB-S-2420-HG-X-X-00-050-050

24 x 24  
DIN Rail  
Layout w/  
1.25" x 3"  
Wire Duct

24 x 24  
Economy  
Layout w/  
1.25" x 3"  
Wire Duct

INSTRUCTIONS: Use Table 1 to select a subpanel that is compatible with your enclosure and NEMA rating. Insert the blue letter for Material Selection in the first highlighted field. Use the interior mounting dimensions in Table 2 to determine which Layout Configuration provides ample space to field mount and wire your components. Choose the blue letter for the appropriate layout drawing and insert this as the first character in the second highlighted field. The second character in this field will indicate wire duct color... "G" for grey or "W" for white.

Select (1) Option and insert the letter to fill in the highlighted field / of the EZ Panel model number

### MODEL SELECTION NOTES

**Note 1:** Insert the letter "X" in this field of the EZ Panel model number if no Option is required.

**Note 2:** All Options are available individually. If more than (1) Option is required, simply order the additional Options using the prefix "EZ-".

Example: If your panel requires a 10 amp circuit breaker... capability to isolate the 24VAC circuits... and (20) extra terminal blocks... you would order (3) items as follows:

- SUB - P - 2424 - HG - X - C - DS -100 - 100 - 100
- EZ - G
- EZ - J

**Note 3:** Photo Shown as typical for panels having (2) transformers

#### 3 AMP Breaker

3 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

A

#### 5 AMP Breaker

5 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

B

#### 10 AMP Breaker

10 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

C

#### 3 AMP Fuse Holder

3 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

D

#### 5 AMP Fuse Holder

5 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

E

#### 10 AMP Fuse Holder

10 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

F

#### Isolate 24VAC Circuit

Switching terminal block substituted for each 24VAC hot terminal block

\*See Note 3

G

#### Terminal Cover

Transparent finger-safe terminal block cover. Threaded nylon nuts must be removed to access terminal block.

# EZ PANEL™ 2424

Custom prefabricated subpanel assemblies

## Model Selection Guide

Options (Continued)

### 10 Extra Terminals

I

**10** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 20 Extra Terminals

J

**20** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 40 Extra Terminals

K

**40** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### Isolated 120VAC

L

Solid wall wire duct to isolate line voltage terminal blocks and all 120VAC circuits. See Supplementary Spec "L" on page...

\*See Note 3

### 2 Gang Cat5E

M

Two gang plastic cover plate with (2) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### 4 Gang Cat5E

N

Four gang plastic cover plate with (4) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### Cat5E Cable

O

5ft Cat5E, male/male cable shipped loose.

\*See Note 3

Jumper Bar	Entrelec	17478420
Jumper Post	Entrelec	16860416
Ground Lug	Thomas & Betts	L70

### MODEL SELECTION NOTES

\* Power control (SW-1) is optional

If no Power Control is selected, insert the letters **XX** in the highlighted field of the EZ Panel Model Number.

If no Power Control is selected, but factory mounted transformers are still required; transformers will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Inserting XX in this field is mandatory if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers. See below for related wiring schematics.

\* \* Transformers (TX-#) are optional

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

#### Power Control Option

15 amps

2 x 4 steel box w/ cover

**DS**

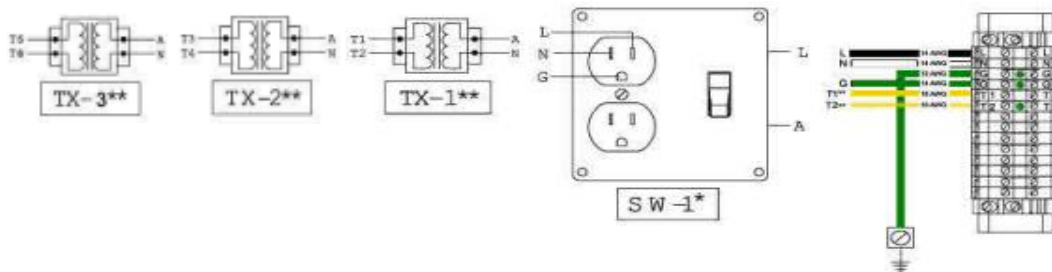

#### Power Control Option

15 amps

4 x 4 steel box w/ cover

**DD**

#### Power Control Option

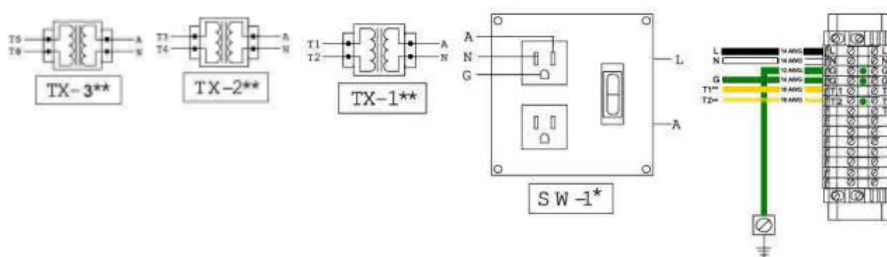

Functional Devices p/n:

PSPT2RB10

10 amps

4 x 4 plastic box w/ cover

**FD**

Internal jumper allows receptacle to be continuously controlled by the switch

See next page for more Power Control Options

### Power Control Option

**DL**

15 amp rated components

4 x 4 steel box w/ cover

\* Includes red indicator light

\* Includes fuse holder w/ 10 amp fuse

Supplemental internal wiring diagram  
for Power Control Option DL only

### Power Control Option

**XX**

Valid option is no factory installed

Power Control device is required for the panel. All transformers are HOT when panel is powered.

Also valid if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers.

Internal jumper allows receptacle to be continuously controlled by the switch.

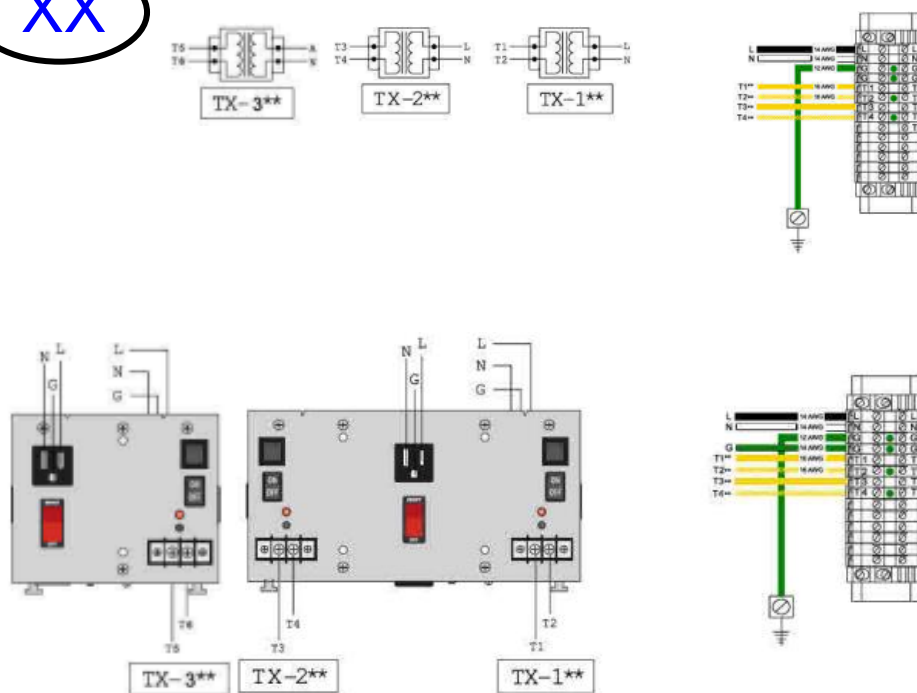

Table	Options	Model #	SUB	-	2424	--	-	-	--	→ --	→ --	→ --
-------	---------	---------	-----	---	------	----	---	---	----	------	------	------

Select Options for up to (2) total transformers and insert the letters to fill in the highlighted fields of the EZ Panel model number

## MODEL SELECTION NOTES

\* Power control (SW-1) from pages 7 & 8 were optional.

If no Power Control is selected, but foot mounted transformers or power supplies are still required; devices will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Due to space limitations, use of Functional Devices PSH Series Combination Power Supplies voids the option to have separate Power Controls from pages 7 & 8. If PSH Series devices are required, you should have the letters "XX" inserted for Power Control. These devices include both an integral disconnect/breaker and low voltage transformers. Together, they take the place of separate power control methods and standard foot mounted transformers. Refer to previous page for wiring schematics.

Transformers (TX-#) are optional

every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

# EZ PANEL™ 2424

Custom prefabricated subpanel assemblies

## Model Selection Guide

Option "L" Supplementary Specification

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with "L" selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option "L" dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option "L" is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

### Power Control Option

**DL**

15 amp rated components

4 x 4 steel box w/ cover

\* Includes red indicator light

\* Includes fuse holder w/ 10 amp fuse

Supplemental internal wiring diagram  
for Power Control Option DL only

### Power Control Option

**XX**

Valid option is no factory installed

Power Control device is required for the panel. All transformers are HOT when panel is powered.

Also valid if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers.

Internal jumper allows receptacle to be continuously controlled by the switch.

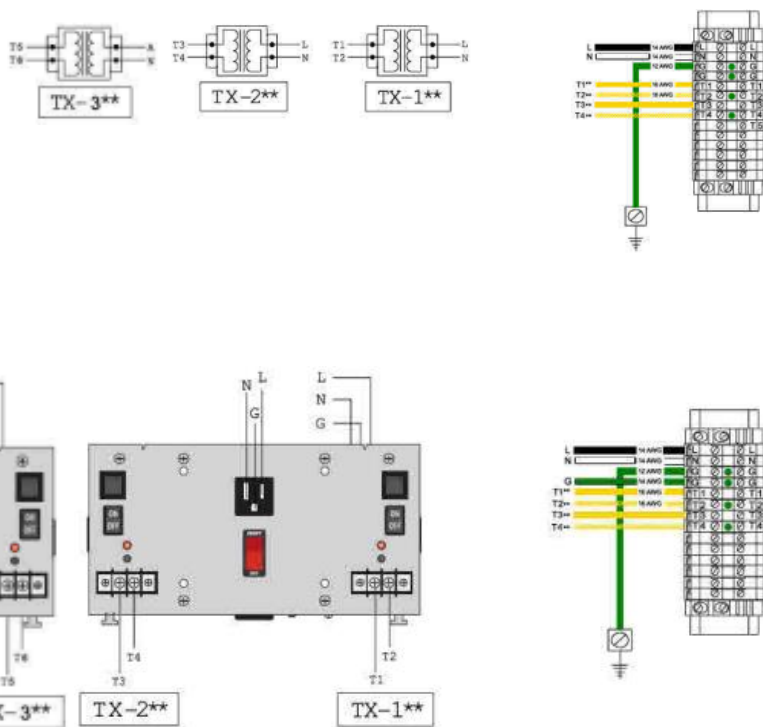

Table	Options	Model #	SUB	_	3024	--	-	-	--	→ --	→ --	→ --
-------	---------	---------	-----	---	------	----	---	---	----	------	------	------

Select Options for up to (2) total transformers and insert the letters to fill in the highlighted fields of the EZ Panel model number

## MODEL SELECTION NOTES

\* Power control (SW-1) from pages 7 & 8 were optional.

If no Power Control is selected, but foot mounted transformers or power supplies are still required; devices will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Due to space limitations, use of Functional Devices PSH Series Combination Power Supplies voids the option to have separate Power Controls from pages 7 & 8. If PSH Series devices are required, you should have the letters "XX" inserted for Power Control. These devices include both an integral disconnect/breaker and low voltage transformers. Together, they take the place of separate power control methods and standard foot mounted transformers. Refer to previous page for wiring schematics.

Transformers (TX-#) are optional

every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

Custom prefabricated subpanel assemblies

## Model Selection Guide

Option "L" Supplementary Specification

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with "L" selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option "L" dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option "L" is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

#### Fill in the blanks to build your custom model number by selecting one Option from each Table

- Consult pages 3 thru 10 to select the Material, Layout, Power Control, and other Options that best suit your application.
- Example model number ... SUB-S-2420-HG-X-X-00-050-050

# EZ PANEL™ 3624

Custom prefabricated subpanel assemblies

## Model Selection Guide

Option "L" Supplementary Specification

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with "L" selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option "L" dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option "L" is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

#### Fill in the blanks to build your custom model number by selecting one Option from each Table

- Consult pages 4 thru 11 to select the Material, Layout, Power Control, and other Options that best suit your application.
- Example model number ... SUB-S-2420-HG-X-X-00-050-050

### New Standard Feature

"H" Layout now includes vertical section of wire duct shipped loose w/ mounting screws.

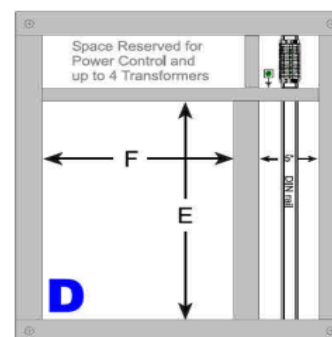

Provides greater flexibility and neater wiring for field installed components.

36 x 30 Horizontal Layout  
w/ 2.25" x 3" and  
1.25" x 3" Wire Duct

36 x 30 Vertical Layout  
w/ 2.25" x 3" and  
1.25" x 3" Wire Duct

36 x 30 DIN Rail Layout  
w/ 2.25" x 3" and  
1.25" x 3" Wire Duct

36 x 30  
Alternate  
DIN Rail  
Layout  
2.25" x 3"  
and  
1.25" x 3"  
Wire Duct

36 x 30 Multi-Configurable  
Layout w/  
2.25" x 3" and  
1.25" x 3" Wire Duct

**NEW**  
Layout Option 

**NEW**  
Layout Option

INSTRUCTIONS: Use Table 1 to select a subpanel that is compatible with your enclosure and NEMA rating. Insert the blue letter for Material Selection in the first highlighted field. Use the interior mounting dimensions in Table 2 to determine which Layout Configuration provides ample space to field mount and wire your components. Choose the blue letter for the appropriate layout drawing and insert this as the first character in the second highlighted field. The second character in this field will indicate wire duct color... "G" for grey or "W" for white.

Select (1) Option and insert the letter to fill in the highlighted field /  
of the EZ Panel model number

### MODEL SELECTION NOTES

**Note 1:** Insert the letter "X" in this field of the EZ Panel model number if no Option is required.

**Note 2:** All Options are available individually. If more than (1) Option is required, simply order the additional Options using the prefix "EZ-".

Example: If your panel requires a 10 amp circuit breaker... capability to isolate the 24VAC circuits... and (20) extra terminal blocks... you would order (3) items as follows:

- SUB - P - 3630 - HG - X - C - DS -100 - 100 - 100 - 100
- EZ - G
- EZ - J

**Note 3:** Photo Shown as typical for panels having (2) transformers

#### 3 AMP Breaker

3 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

A

#### 5 AMP Breaker

5 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

B

#### 10 AMP Breaker

10 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

C

#### 3 AMP Fuse Holder

3 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

D

#### 5 AMP Fuse Holder

5 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

E

#### 10 AMP Fuse Holder

10 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

F

#### Isolate 24VAC Circuit

Switching terminal block substituted for each 24VAC hot terminal block

\*See Note 3

G

#### Terminal Cover

Transparent finger-safe terminal block cover. Threaded nylon nuts must be removed to access terminal block.

# EZ PANEL™ 3630

Custom prefabricated subpanel assemblies

## Model Selection Guide

Options (Continued)

### 10 Extra Terminals

I

**10** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 20 Extra Terminals

J

**20** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 40 Extra Terminals

K

**40** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### Isolated 120VAC

L

Solid wall wire duct to isolate line voltage terminal blocks and all 120VAC circuits. See Supplementary Spec "L" on page...

\*See Note 3

### 2 Gang Cat5E

M

Two gang plastic cover plate with (2) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### 4 Gang Cat5E

N

Four gang plastic cover plate with (4) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### Cat5E Cable

O

5ft Cat5E, male/male cable shipped loose.

\*See Note 3

### TYPICAL WIRING

### TERMINAL ASSEMBLY

Shown for (2) transformers

#### Bill of Materials

COMPONENT	MANUFACTURER	PART NO.
Terminal Block	Entrelec	11511607
End Plate	Entrelec	11836816
End Stop	Entrelec	20635116
Marking Cards	Entrelec	23300001
Jumper Bar	Entrelec	17478420
Jumper Post	Entrelec	16860416
Ground Lug	Thomas & Betts	L70

### MODEL SELECTION NOTES

\* Power control (SW-1) is optional

If no Power Control is selected, insert the letters **XX** in the highlighted field of the EZ Panel Model Number.

If no Power Control is selected, but factory mounted transformers are still required; transformers will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Inserting XX in this field is mandatory if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers. See below for related wiring schematics.

\* \* Transformers (TX-#) are optional

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

#### Power Control Option

15 amps  
2 x 4 steel box w/ cover

**DS**

#### Power Control Option

15 amps  
4 x 4 steel box w/ cover

**DD**

#### Power Control Option

Functional Devices p/n:  
PSPT2RB10  
10 amps  
4 x 4 plastic box w/ cover

**FD**

Internal jumper allows  
receptacle to be continuously  
controlled by the switch

See next page for more Power Control Options

### Power Control Option

**DL**

- 15 amp rated components
- 4 x 4 steel box w/ cover
- \* Includes red indicator light
- \* Includes fuse holder w/ 10 amp fuse

Supplemental internal wiring diagram for Power Control Option DL only

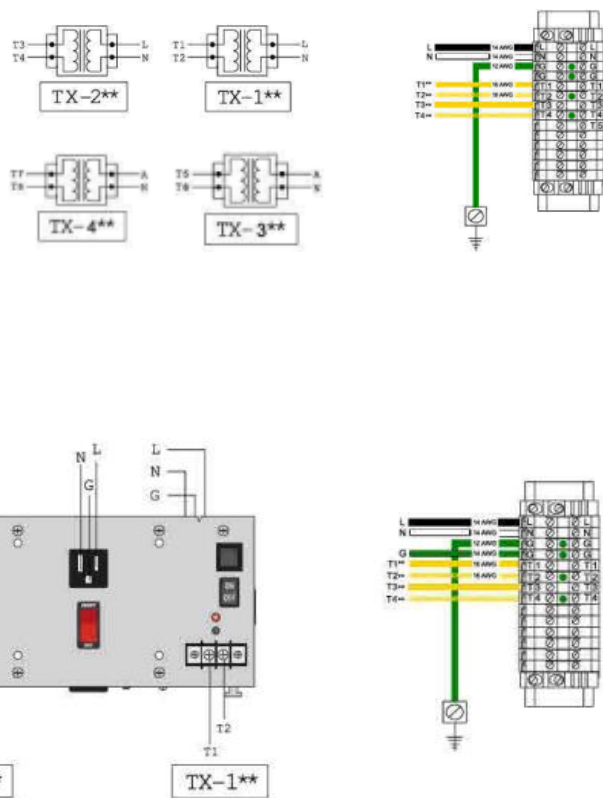

### Power Control Option

**XX**

Valid option is no factory installed Power Control device is required for the panel. All transformers are HOT when panel is powered.

Also valid if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers.

Internal jumper allows receptacle to be continuously controlled by the switch.

[illegible]

Select Options for up to (2) total transformers and insert the letters to fill in the highlighted fields of the EZ Panel model number

## MODEL SELECTION NOTES

\* Power control (SW-1) from pages 7 & 8 were optional.

If no Power Control is selected, but foot mounted transformers or power supplies are still required; devices will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Due to space limitations, use of Functional Devices PSH Series Combination Power Supplies voids the option to have separate Power Controls from pages 7 & 8. If PSH Series devices are required, you should have the letters “XX” inserted for Power Control. These devices include both an integral disconnect/breaker and low voltage transformers. Together, they take the place of separate power control methods and standard foot mounted transformers. Refer to previous page for wiring schematics.

Transformers (TX-#) are optional

every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

# EZ PANEL™ 3630

Custom prefabricated subpanel assemblies

## Model Selection Guide

Option "L" Supplementary Specification

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with "L" selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option "L" dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option "L" is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

#### Fill in the blanks to build your custom model number by selecting one Option from each Table

- Consult pages 4 thru 11 to select the Material, Layout, Power Control, and other Options that best suit your application.
- Example model number ... SUB-S-2420-HG-X-X-00-050-050

## Custom prefabricated subpanel assemblies

### Subpanel Material and Layout Options

42 x 30 Vertical Layout  
w/ 2.25" x 3" and  
1.25" x 3" Wire Duct

42 x 30 Alternate DIN Rail Layout  
2.25" x 3" and  
1.25" x 3" Wire Duct

"H" Layout now includes vertical section of wire duct shipped loose w/ mounting screws.

Provides greater flexibility and neater wiring for field installed components.

INSTRUCTIONS: Use Table 1 to select a subpanel that is compatible with your enclosure and NEMA rating. Insert the blue letter for Material Selection in the first highlighted field. Use the interior mounting dimensions in Table 2 to determine which Layout Configuration provides ample space to field mount and wire your components. Choose the blue letter for the appropriate layout drawing and insert this as the first character in the second highlighted field. The second character in this field will indicate wire duct color... “G” for grey or “W” for white.

**NEW**  
Layout Options

Layout now includes vertical section of wire duct shipped loose w/ mounting screws.

Provides greater flexibility and neater wiring for field installed components.

## Model Selection Guide

Options (Continued)

### 10 Extra Terminals

I

**10** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 20 Extra Terminals

J

**20** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 40 Extra Terminals

K

**40** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### Isolated 120VAC

L

Solid wall wire duct to isolate line voltage terminal blocks and all 120VAC circuits. See Supplementary Spec "L" on page...

\*See Note 3

### 2 Gang Cat5E

M

Two gang plastic cover plate with (2) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### 4 Gang Cat5E

N

Four gang plastic cover plate with (4) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### Cat5E Cable

O

5ft Cat5E, male/male cable shipped loose.

\*See Note 3

### MODEL SELECTION NOTES

\* Power control (SW-1) is optional

If no Power Control is selected, insert the letters **XX** in the highlighted field of the EZ Panel Model Number.

If no Power Control is selected, but factory mounted transformers are still required; transformers will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Inserting XX in this field is mandatory if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers. See below for related wiring schematics.

\* \* Transformers (TX-#) are optional

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

#### Power Control Option

15 amps

for Power Control Option DL only

### Power Control Option

**XX**

Valid option is no factory installed

Power Control device is required for the panel. All transformers are HOT when panel is powered.

Also valid if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers.

Internal jumper allows receptacle to be continuously controlled by the switch.

-------	---------	---------	-----	---	------	-----	---	---	-----	---	-----	---	-----	---	-----	---	-----

Select Options for up to (2) total transformers and insert the letters to fill in the highlighted fields of the EZ Panel model number

## MODEL SELECTION NOTES

\* Power control (SW-1) from pages 7 & 8 were optional.

If no Power Control is selected, but foot mounted transformers or power supplies are still required; devices will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Due to space limitations, use of Functional Devices PSH Series Combination Power Supplies voids the option to have separate Power Controls from pages 7 & 8. If PSH Series devices are required, you should have the letters “XX” inserted for Power Control. These devices include both an integral disconnect/breaker and low voltage transformers. Together, they take the place of separate power control methods and standard foot mounted transformers. Refer to previous page for wiring schematics.

Transformers (TX-#) are optional

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

## Functional Devices Transformers

# EZ PANEL™ 4230

Custom prefabricated subpanel assemblies

## Model Selection Guide

Option "L" Supplementary Specification

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with "L" selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option "L" dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option "L" is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

# EZ PANEL™ 4236

42 x 36 I/O DIN Rail Layout  
w/ 2.25" x 3" and  
1.25" x 3" Wire Duct

Provides greater flexibility and neater wiring for field installed components.

**INSTRUCTIONS:** Use Table 1 to select a subpanel that is compatible with your enclosure and NEMA rating. Insert the blue letter for Material Selection in the first highlighted field. Use the interior mounting dimensions in Table 2 to determine which Layout Configuration provides ample space to field mount and wire your components. Choose the blue letter for the appropriate layout drawing and insert this as the first character in the second highlighted field. The second character in this field will indicate wire duct color... "G" for grey or "W" for white.

**NEW**  
Layout Options

Select (1) Option and insert the letter to fill in the highlighted field / of the EZ Panel model number

### MODEL SELECTION NOTES

**Note 1:** Insert the letter "X" in this field of the EZ Panel model number if no Option is required.

**Note 2:** All Options are available individually. If more than (1) Option is required, simply order the additional Options using the prefix "EZ-".

Example: If your panel requires a 10 amp circuit breaker... capability to isolate the 24VAC circuits... and (20) extra terminal blocks... you would order (3) items as follows:

- SUB - P - 4236 - HG - X - C - DS -100 - 100 - 100 - 100 - 100
- EZ - G
- EZ - J

**Note 3:** Photo Shown as typical for panels having (2) transformers

#### 3 AMP Breaker

3 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

A

#### 5 AMP Breaker

5 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

B

#### 10 AMP Breaker

10 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

C

#### 3 AMP Fuse Holder

3 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

D

#### 5 AMP Fuse Holder

5 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

E

#### 10 AMP Fuse Holder

10 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

F

#### Isolate 24VAC Circuit

Switching terminal block substituted for each 24VAC hot terminal block

\*See Note 3

G

#### Terminal Cover

Transparent finger-safe terminal block cover. Threaded nylon nuts must be removed to access terminal block.

## Model Selection Guide

Options (Continued)

### 10 Extra Terminals

I

**10** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 20 Extra Terminals

J

**20** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 40 Extra Terminals

K

**40** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### Isolated 120VAC

L

Solid wall wire duct to isolate line voltage terminal blocks and all 120VAC circuits. See Supplementary Spec "L" on page...

\*See Note 3

### 2 Gang Cat5E

M

Two gang plastic cover plate with (2) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### 4 Gang Cat5E

N

Four gang plastic cover plate with (4) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### Cat5E Cable

O

5ft Cat5E, male/male cable shipped loose.

\*See Note 3

Ground Lug	Thomas & Betts	L70

### MODEL SELECTION NOTES

\* Power control (SW-1) is optional

If no Power Control is selected, insert the letters **XX** in the highlighted field of the EZ Panel Model Number.

If no Power Control is selected, but factory mounted transformers are still required; transformers will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Inserting XX in this field is mandatory if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers. See below for related wiring schematics.

\* \* Transformers (TX-#) are optional

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

#### Power Control Option

15 amps  
2 x 4 steel box w/ cover

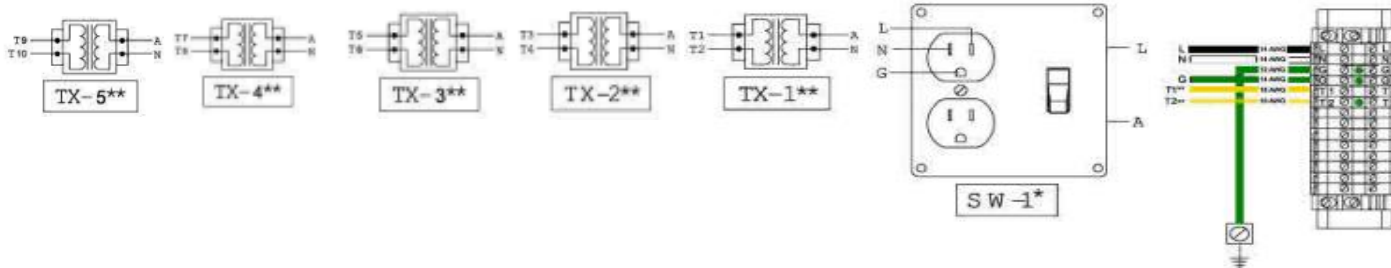

**DS**

#### Power Control Option

15 amps  
4 x 4 steel box w/ cover

**DD**

#### Power Control Option

Functional Devices p/n:  
PSPT2RB10  
10 amps  
4 x 4 plastic box w/ cover

**FD**

Internal jumper allows  
receptacle to be continuously  
controlled by the switch

See next page for more Power Control Options

### Power Control Option

**DL**

15 amp rated components

4 x 4 steel box w/ cover

\* Includes red indicator light

\* Includes fuse holder w/ 10 amp fuse

Supplemental internal wiring diagram  
for Power Control Option DL only

### Power Control Option

**XX**

Valid option is no factory installed

Power Control device is required for the panel. All transformers are HOT when panel is powered.

Also valid if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers.

Internal jumper allows receptacle to be continuously controlled by the switch.

[illegible]

Select Options for up to (2) total transformers and insert the letters to fill in the highlighted fields of the EZ Panel model number

## MODEL SELECTION NOTES

\* Power control (SW-1) from pages 7 & 8 were optional.

If no Power Control is selected, but foot mounted transformers or power supplies are still required; devices will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Due to space limitations, use of Functional Devices PSH Series Combination Power Supplies voids the option to have separate Power Controls from pages 7 & 8. If PSH Series devices are required, you should have the letters “XX” inserted for Power Control. These devices include both an integral disconnect/breaker and low voltage transformers. Together, they take the place of separate power control methods and standard foot mounted transformers. Refer to previous page for wiring schematics.

Transformers (TX-#) are optional

every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

## Functional Devices Transformers

EZ OPTION	PART NO.	INPUT	OUTPUT	VA	HUBS	FEATURES
040	TR40VA001	120 VAC	24 VAC	40	1	Class 2, UL Listed w/ circuit breaker

Custom prefabricated subpanel assemblies

## Model Selection Guide

Option "L" Supplementary Specification

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with "L" selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option "L" dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option "L" is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

#### Fill in the blanks to build your custom model number by selecting one Option from each Table

- Consult pages 4 thru 11 to select the Material, Layout, Power Control, and other Options that best suit your application.
- Example model number ... SUB-S-2420-HG-X-X-00-050-050

# EZ PANEL™ 4836

Custom prefabricated subpanel assemblies

## Model Selection Guide

Subpanel Material and Layout Options

48 x 36 Horizontal Layout  
w/ 2.25" x 3" and  
1.25" x 3" Wire Duct

48 x 36 Vertical Layout  
w/ 2.25" x 3" and  
1.25" x 3" Wire Duct

48 x 36 DIN Rail Layout  
w/ 2.25" x 3" and  
1.25" x 3" Wire Duct

48 x 36 I/O DIN Rail Layout  
w/ 2.25" x 3" and  
1.25" x 3" Wire Duct

**New Standard Feature**  
Layout now includes vertical section of wire duct shipped loose w/ mounting screws.  
Provides greater flexibility and neater wiring for field installed components.

INSTRUCTIONS: Use Table 1 to select a subpanel that is compatible with your enclosure and NEMA rating. Insert the blue letter for Material Selection in the first highlighted field. Use the interior mounting dimensions in Table 2 to determine which Layout Configuration provides ample space to field mount and wire your components. Choose the blue letter for the appropriate layout drawing and insert this as the first character in the second highlighted field. The second character in this field will indicate wire duct color... "G" for grey or "W" for white.

**NEW**  
Layout Option

Select (1) Option and insert the letter to fill in the highlighted field / of the EZ Panel model number

### MODEL SELECTION NOTES

**Note 1:** Insert the letter "X" in this field of the EZ Panel model number if no Option is required.

**Note 2:** All Options are available individually. If more than (1) Option is required, simply order the additional Options using the prefix "EZ-".

Example: If your panel requires a 10 amp circuit breaker... capability to isolate the 24VAC circuits... and (20) extra terminal blocks... you would order (3) items as follows:

- SUB - P - 4836 - HG - X - C - DS -100 - 100 - 100 - 100 - 100
- EZ - G
- EZ - J

**Note 3:** Photo Shown as typical for panels having (2) transformers

#### 3 AMP Breaker

3 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

A

#### 5 AMP Breaker

5 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

B

#### 10 AMP Breaker

10 amp DIN rail mounted circuit breaker substituted for terminal "L"

\*See Note 3

C

#### 3 AMP Fuse Holder

3 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

D

#### 5 AMP Fuse Holder

5 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

E

#### 10 AMP Fuse Holder

10 amp fuse holder terminal with fast-blo fuse substituted for terminal "L"

\*See Note 3

F

#### Isolate 24VAC Circuit

Switching terminal block substituted for each 24VAC hot terminal block

\*See Note 3

G

#### Terminal Cover

Transparent finger-safe terminal block cover. Threaded nylon nuts must be removed to access terminal block.

# EZ PANEL™ 4836

Custom prefabricated subpanel assemblies

## Model Selection Guide

Options (Continued)

### 10 Extra Terminals

I

**10** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 20 Extra Terminals

J

**20** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### 40 Extra Terminals

K

**40** numbered terminal blocks mounted on a 12" section of DIN rail shipped loose with mtg screws (required field installation)

\*See Note 3

### Isolated 120VAC

L

Solid wall wire duct to isolate line voltage terminal blocks and all 120VAC circuits. See Supplementary Spec "L" on page...

\*See Note 3

### 2 Gang Cat5E

M

Two gang plastic cover plate with (2) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### 4 Gang Cat5E

N

Four gang plastic cover plate with (4) Cat5E jacks mounted on a 2x4 handi-box. Items ship loose w/ mtg screws.

\*See Note 3

### Cat5E Cable

O

5ft Cat5E, male/male cable shipped loose.

\*See Note 3

Ground Lug	Thomas & Betts	L70

### MODEL SELECTION NOTES

\* Power control (SW-1) is optional

If no Power Control is selected, insert the letters **XX** in the highlighted field of the EZ Panel Model Number.

If no Power Control is selected, but factory mounted transformers are still required; transformers will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Inserting XX in this field is mandatory if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers. See below for related wiring schematics.

\* \* Transformers (TX-#) are optional

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

#### Power Control Option

15 amps  
2 x 4 steel box w/ cover

**DS**

#### Power Control Option

15 amps  
4 x 4 steel box w/ cover

**DD**

#### Power Control Option

Functional Devices p/n:  
PSPT2RB10  
10 amps  
4 x 4 plastic box w/ cover

**FD**

Internal jumper allows  
receptacle to be continuously  
controlled by the switch

See next page for more Power Control Options

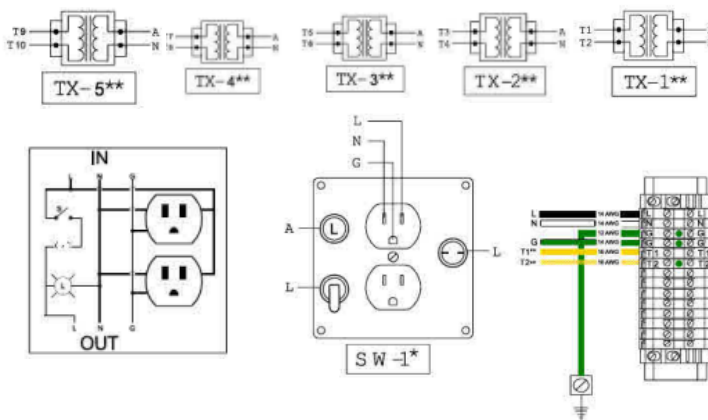

### Power Control Option

**DL**

- 15 amp rated components
- 4 x 4 steel box w/ cover
- \* Includes red indicator light
- \* Includes fuse holder w/ 10 amp fuse

Supplemental internal wiring diagram for Power Control Option DL only

### Power Control Option

**XX**

Valid option is no factory installed Power Control device is required for the panel. All transformers are HOT when panel is powered.

Also valid if Functional Devices PSH Series Combination Power Supplies are being used in lieu of standard foot mounted transformers.

Internal jumper allows receptacle to be continuously controlled by the switch.

[illegible]

Select Options for up to (2) total transformers and insert the letters to fill in the highlighted fields of the EZ Panel model number

## MODEL SELECTION NOTES

\* Power control (SW-1) from pages 7 & 8 were optional.

If no Power Control is selected, but foot mounted transformers or power supplies are still required; devices will be wired directly to the L and N terminals and will be continuously HOT when the panel is powered.

Due to space limitations, use of Functional Devices PSH Series Combination Power Supplies voids the option to have separate Power Controls from pages 7 & 8. If PSH Series devices are required, you should have the letters “XX” inserted for Power Control. These devices include both an integral disconnect/breaker and low voltage transformers. Together, they take the place of separate power control methods and standard foot mounted transformers. Refer to previous page for wiring schematics.

**\*\* Transformers (TX-#) are optional**

Every panel includes (14) total terminal blocks regardless of the transformer quantity chosen. If the maximum number of transformers is not selected, the unused terminals will include blank markers and will be available for other field terminations is required.

Custom prefabricated subpanel assemblies

## Model Selection Guide

Option "L" Supplementary Specification

This is a supplementary specification guide and should be used in conjunction with the standard EZ Panel Model Selection Guides for each panel size offered in our product line. This document only applies to EZ Panels with "L" selected in the Options table. This design satisfies separation of circuits as well as strict panel standards which prohibit exposed 120VAC or line voltage wiring. Please note that choosing Option "L" dictates some panel choices and limits others. Specifying panels with this option reduces the standard available interior, module mounting space for all sizes and all applicable layouts. Please follow model selection instructions carefully.

Only Horizontal and Vertical layouts are shown below. However, Option "L" is available with every size and layout in the EZ Panel product line. Feature details shown on the horizontal layout are typical except that reduced interior mounting dimensions will vary depending on what size wire duct is replaced by the solid wall duct.

# EZ PANEL Solutions

## Panel Receptacle & Switch Assemblies

Panel Fab receptacle and disconnect assemblies provide you with another time-saving solution for your panel fabrication. Seven different models offer convenience and functionality for every panel application.

All models feature UL Listed commercial grade components and are prewired with push-on connectors for fast field installation.

### EZ-DL

Disconnect, Light,  
Fuse, Receptacle

### EZ-DF

Disconnect, Fuse,  
Receptacle

### EZ-DD

Disconnect & Duplex  
Receptacle

### EZ-DS

Disconnect & Single  
Receptacle

### EZ-TL

Toggle Switch & Light

### EZ-TO

Toggle Switch Only

### EZ-RO

Receptacle Only

### Features

- Prewired with convenient quick connectors
- Includes non-conductive toggle switch boot
- Includes 10 amp fuse
- Saves time and money

### Wiring

### Specs

# TERMS AND CONDITIONS

## NOTICE:

Orders are accepted with the understanding that items will be billed at the price in effect on the day of order entry.

## PLEASE INSPECT THE SHIPMENT IMMEDIATELY

Panel Fab, Inc. tries to ensure that your shipment has been made to the highest standards of quality. In the event that an error or damage occurs, the following procedure must be followed:

Any damage or loss incurred in transit is the responsibility of the carrier.

### Damage/Loss

#### UPS or other Parcel Shipments

1. Notify freight carrier driver at time of delivery if any carton shows physical damage.
2. Notify Panel Fab customer service department @470-412-0173 within 5 days of delivery.
3. Retain the merchandise AND packing material for inspection by the carrier.

#### Common Carrier (truck) Shipments

1. Notify freight carrier driver at time of delivery if any carton or crate shows physical damage.
2. Notify Panel Fab customer service department @470-412-0173 within 5 days of delivery.
3. For common carrier claims, the carrier requires the recipient of the merchandise to file claims and receive reimbursement. Panel Fab, Inc. cannot file the claim and therefore cannot issue credit to your account. You must contact the carrier and file the claim directly to be reimbursed. Failure to follow these instructions may result in forfeiture of monies due to you.

## CREDIT

New customers or accounts considered inactive are required to apply for credit in order to place an order. To apply for a credit account, please contact the Panel Fab customer service department, and a Credit Application will be provided to you. Credit Applications can be submitted via email to [sales@panelfabricator.com](mailto:sales@panelfabricator.com).

## TERMS

Net 30 day terms will be granted for all customers who have submitted a credit application. A 50% deposit may be required for custom panel projects.

## PRICES

All prices are subject to change without notice.  
No deduction will be allowed at settlement.  
All orders are subject to a \$25.00 minimum.

## WARRANTY

All merchandise is produced to standard and commercial tolerances. Panel Fab warrants products to be free from defects in workmanship and material. Warranties for panel components manufactured by others will carry that manufacturer's warranty. When Panel Fab has determined that a product or panel component is defective, they will, at their discretion, ship a replacement part or issue a credit to your account for the cost of the defective item. Warranty coverage does not cover any labor as required to troubleshoot, or replace defective components. Any return shipment to Panel Fab for completed panels or components will be done at the customer's expense. No other warranty is expressed or implied.

## LIABILITY

The customer shall test and verify the suitability of the product for the intended use. No warranty for intended use is made. The customer assumes all risk and liability. Panel Fab's only obligation is replacement or credit for product proven defective. Panel Fab shall not be liable for any loss or damage from the use or inability to use the product.

## RETURNED GOODS

**ALL SALES ARE FINAL - RETURNS WILL BE AT PANEL FAB'S DISCRETION.** Do not return any merchandise for any reason without first calling our customer service department at 470-412-0173. All unauthorized returns will be refused at our dock. Stock items ordered in error may be returned at customer expense for credit within 30 days and are subject to a 20% restocking fee. EZ Panels may be returned at customer expense for credit within 30 days and are subject to a 30% restocking fee. Returns over 30 days from invoice date will not be accepted. All returned items must be in re-saleable condition. Please have our invoice number available when calling to request any return. Custom panels cannot be returned.

**Note: Any products altered by the customer are not returnable.**
